Solutions for Your Key Problems!

We offer an Affordable Solution to protect and organize your valuable keys with Precise Accountability at a low cost

Our key manager secure lock innovative mechanical key management systems provides user friendly key control solutions for, car dealerships, and other businesses that require an organized key solution. The keys to your facilities and business are one of its most important assets. Without access to your keys you cant control your business and vehicle keys and other assets. The secured key system provides the perfect solution by giving you the highest level of control and security for your valuable vehicle keys.

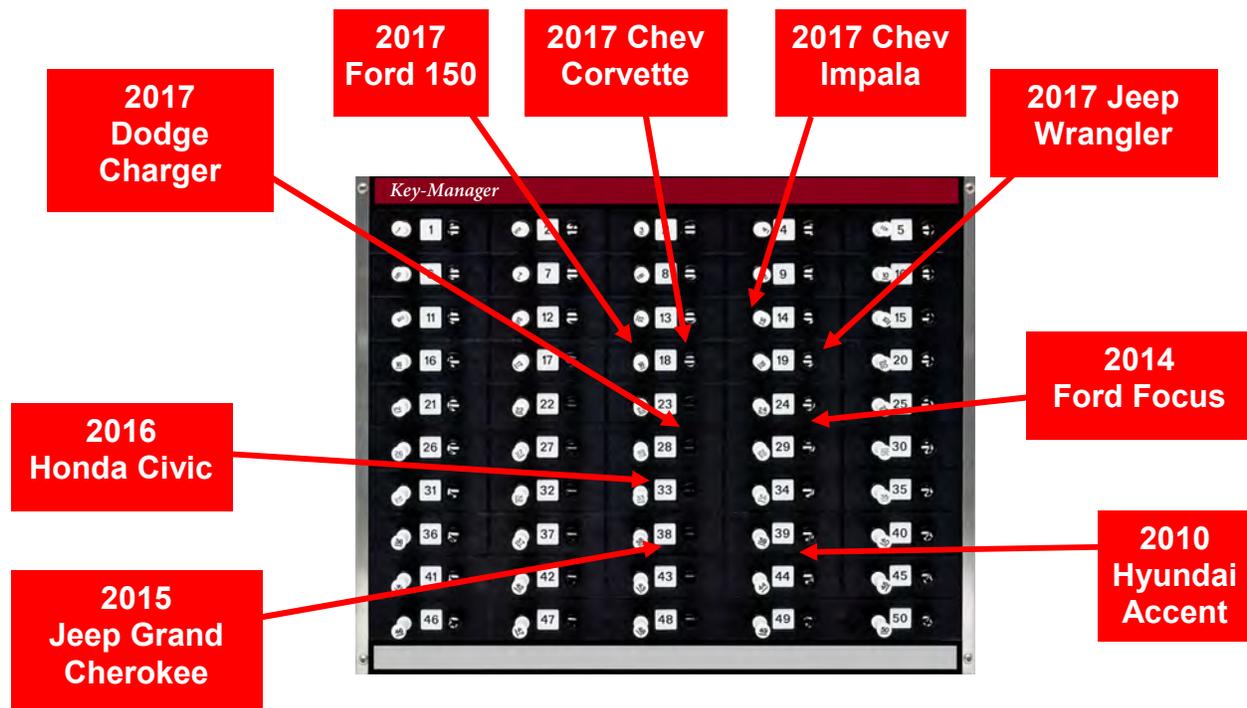

With our key manager secure lock innovative automotive key system, management and staff will always know who has removed the vehicle keys and who the users are that have the key/keys etc. Thus saving a lot of time if another user requires a certain vehicle key or keys that are not in the cabinet or wall board key system.

The way our key manager mechanical key systems work is an authorized user with their assigned access ID key peg enters their user ID key peg into the key lock holder with the vehicle key/keys they require once the user ID key peg is inserted into the key lock holder the required keys are then released. When the user returns the vehicle keys they would insert the key peg holder with the attached keys back to the key lock holder, the key lock holder would than release the users ID key peg.

North America's Most Affordable Automotive Key Management Systems

Key-Manager Key/Asset Management for all Automotive Dealerships

Ever lose a sale because a key couldn't be found? Let Key-Manager automotive key systems cure your key management issues in your business organization. Key-Manager is a key management system that tracks and secures keys...and comes with control tools to help you keep costs down and sales up.

Do you know where your valuable Vehicle keys are? With Key-Manager key systems you'll always know where your vehicle keys are

Key-Manager Secures Keys and Helps

- Prevent lost sales from lost keys
- Secure keys and protect inventory
- Control key access to vehicles on your lot
- Track who removed the keys
- Eliminate costs for replacing lost keys and key fobs
- Reduce liabilities for theft and floor plan insurance
- Increase productivity and responsibility
- Save more, spend less on key control.

Key-Manager Key Management Systems

Never Lose Track of Your Vehicle Keys Again!

A smarter way to keep track of vehicle keys. The Key-Manager **innovative** key systems comes ready to use. Simply snap keys together on a locking secure peg, tamper seal ID tag and place into keyboard. Keys can only be removed with an access key peg. Once an access key peg is used to release the vehicle keys the access key peg cannot be removed until the vehicle keys are placed back into the board. Assign access key peg to sales staff and service people. You'll always know who has the vehicle keys by looking at the personalized access key. A master key provided with each system will remove all keys without remaining in the board so that all vehicles can be removed from the lot for snow plowing, sales etc. available with or without locking steel cabinets. The **Key-Manager** key system wall boards and cabinets are built from the highest quality materials for long lasting operations.

Secure Solutions for Car Dealerships

How does the system work?

After installing key manager

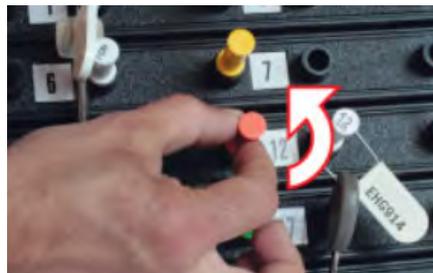

- You will always know who is in possession of each key as they are provided with a users identification access peg.
- The keys may only be removed by authorized personnel with their access pegs

The keys are attached to the system by an anti-tamper security key holder

The colored access peg is inserted to remove the desired key from the system

By turning the access peg the system is activated and the desired key is released

The colored access peg retained on the board will identify the user who has not returned the key
