Key-Rack

Key-Rack Intelligent Locking Wall Mountable Key Strips

Pair your keys with the intelligent key fobs and place them in the Key-Rack system's lockable key strips, directly on the wall. It couldn't be easier to obtain an overview and total control of your key stock. With Key-Rack, you can expand your intelligent key storage up to a maximum from 14 key of 66 strips with 924 unique key places. Get maximum overview by mounting directly on the wall

Intelligent Key Management Solutions For All Facilities

Key-Rack Modular Key System

Introducing The Key-Rack Automated Modular Key Management Systems

If you've been searching for a way to protect your organization's assets and resources, **Key-Rack** intelligent access management systems could prove to be that elusive answer - by turning your conventional key into an 'intelligent key'

The **Key-Rack** Key Management System has been designed to provide a quick and easy method of issuing and controlling keys. In addition, Key Rack provides instant information as to the current user of a key, the previous user as well as a complete history of the key usage. Key-Rack can also restrict access to individual keys thus enabling cost effective and efficient management of keys, reducing losses as well as time and energy trying to locate misplaced or keys taken off site

Key-Rack enables you to control, monitor and record the use of almost any physical asset, including: premises, facilities, secure areas, equipment, machinery and vehicles. Key-Rack provides intelligent key management and equipment management access control to better protect your important assets - resulting in improved efficiency, reduced downtime, less damage, fewer losses, lower operating costs and significantly less administration costs.

The way the **Key-Rack** automated key system works is each individual user would be issued a preselected personal PIN number the user would then enter his/her PIN on the keypad located on the control pod. The Key-Rack would automatically only release the keys the user is authorized to have. All the rest of the keys in the key strip would stay locked in place. The system would record when the keys were taken and when they are returned. If the keys are not returned within the curfew period the system would automatically generate an email and send out to management or security to alert them that a key or keys have not been returned within the curfew period, who the user is etc. The system would give you full audit trail 24/7 of who took the keys, when they were returned etc. The system will also make your staff more accountable for your facilities valuable keys.

**Solid Metal Lockable
Intelligent Key Fobs**

KeyWin 6 Pro Software

Key-Rack can be custom configured to meet your requirements

**Key-Rack modular key system
consists of the following modular**

- **Control Pod**
- **14 Key slot key strip includes:**
14 intelligent key fobs and 14, Tamper proof key rings
- **Mounting kit**
for mounting up to 5 strips
- **Mounting kit**
for mounting up to 10 strips
- **KeyWin 6 Pro key**
management software

Easy to Follow Instructions

Key-Rack is very easy to set up by the customer. We offer unlimited remote set up support at no extra charge

The Key Rack can be configured up to 924 key slot capacity or as little as 14 key slot capacity in one main control pod system depending on the application the key rack system is expandable you can have as many key rack or key box systems on the same network as you require. Each control pod system has its own unique IP address

Key-Rack

Intelligent Solutions for securing your valuable keys/assets

A brief description on how the Key-Rack **Secure-Lock** locking key fobs work

The way **Key-Rack** automated key systems work with the individual **High Security "Secure-Lock" Locking Key Fobs**. Each individual user is issued a pre-selected PIN which is entered on the control pod keypad. Once the PIN is entered and authorized by the system, the system would then release the key or keys that are authorized to the user. The remainder of the keys stay securely locked in the key strips after a key is removed the system records when it was taken, when it is returned and the user's information etc. If a curfew or time limit is set in the system, and a key is not returned on time, the system will automatically generate an email to management notifying them of the past due key/keys and user name etc. The system therefore gives you a complete audit trail 24/7 of the usage on your valuable facilities, assets and vehicle keys while encouraging user accountability

Our **Secure-Lock** 100% solid metal intelligent locking key fobs is the intelligent choice for securing keys/assets

Choosing the size of the key slot capacity in your Key-Rack system is an easy task Simply choose the number of key strips you require in the system each key strip contains 14 key slots

Example (1) if you require a 70 x key slot capacity you would require 5 x key strips, 1 x control Pod, 1 x 5 key strip mount kit

Example (2) if you require a 140 x key slot capacity you would require 10 x key strips, 1 x control Pod, 1 x 10 key strip mount kit

All Key-Rack key systems include our exclusive **Secure-Lock 100% solid metal locking key fobs for securing your valuable keys/assets**

Key-Rack Intelligent Key/Asset Management for all Types of Businesses and Organizations

For Storing/Securing All Businesses / Organizations Facility/Asset Keys

Key-Rack

The Key-Rack software provides a full audit trail and real time reporting, detailing who has used each set of keys and when. As a result, staff become more accountable and our customers have found that keys are returned at the end of shifts. This leads to reduce security requirements, with less loss, damage and liability

Benefits

- Manage, control and report on the use of facility and asset keys
- Identify when keys are taken and returned, and by whom
- Restrict access to specific site and facility keys for staff and contractors
- Improve shift start-ups by ensuring important keys are always in place and ready to use
- Completely remove the need for manual key issue
- Reduce losses and damage by making users fully accountable
- Fully scalable to accommodate any number of keys
- 24/7 Audit trails of all key activities.

Do you know where your valuable facilities keys are? With Key-Rack automated key systems you'll always know where your keys are 24/7!

Key-Rack Specifications

KeyRack Assembly

All dimensions are in mm

Specifications:

Power Supply: Input: AC120-240V Output: VDC

Battery Backup: DC12V 1.2Ah (1-2 hours)

Power Consumption: 65W max/0.3A

Cabinet Material/Mounting Rails: Steel

Color Options: Light Grey Powder Coated

Operating Temp: Ambient For Indoor Use Only

Mounting: Wall mounted

Key Positions: 14 - 924

Receptor Strip Support: 14 Key slot Locking

Users per systems: 10,000 plus

Communications: Ethernet

Reader Interface: Wiegand

Key Management Software

Smart and Simple

Administrative tool for
management of your
valuable keys

KeyWin 6-Pro Standard Network software is
included free of charge with all **Key-Box** key management
systems with no annual fees!

Key-Box Key Systems are Powered By **KeyWin 6-PRO**

Standard Key Management Software with Total Accountability

KeyWin 6-PRO

Gives you total control. Easy to use, Easy to Manage

Flexible KeyWin 6 makes it easy to manage everything from around 10 keys up to several thousand keys. You can use one key cabinet or 100 key cabinets in the same key management system and at different locations. The key management system can be managed by a single administrator, or shared with other administrators.

Users, groups and keys are simple and quick to register. You determine which users and groups get which keys by connecting them in the key management system. Every use of the key is registered, and a simple search lets you find out who has had what key and when.

KeyWin 6-PRO Standard Software Countdown Function Feature

This function determines how many times the user can enter the key cabinet, value box or compartment

KeyWin 6-PRO Standard Software Provides total Control of your keys - Even from the other side of the world

KeyWin 6 keeps your keys in order. You can easily connect via TCP/IP and communicate via the network connection so you can simply administer and program your Key control series key cabinet, whether you are in the same office block or anywhere in the world.

You log into the key cabinet as a user using your personal code. Each key has a key peg with a unique identity, which is placed in a strip that in turn communicates with the KeyWin 6 key management program, where each separate event is registered. The key strips then indicate which keys you have access to or, if a key has already been removed, you receive information on the display about who is using the key. You can also search for historic information about keys in KeyWin5 program.

KeyWin5 - PRO Loaded with Features

Easy to Use

The administrator determines the members of staff who have access to a specific key by entering which user can log into the key cabinet or value box with his or her personal code.

Create User Groups

You can simplify administration when there are many users with different access rights by creating groups. It is possible to create both key groups and user groups

Name Keys

You give each key a name of your choice, or a key ID, to create order in your key management.

Intelligent Search Functions The search function finds everything in KeyWin, since it searches on files, email, contacts, groups, alarms, etc. - as fast as you type.

Visual Cabinet View Gives you the option to view the key cabinet's status and edit the keys in the key cabinet.

Time Channel Limit a group's use by setting a time channel. The group's keys are available when the time channel is active.

Event Log All events are registered in the log, both from key cabinets and from KeyWin5. You choose what will be shown. The intelligent search function, with select options and timeframe, simplifies obtaining the right information and producing reports

Backup You can easily create backups for the entire key management program. They are automatically named with the date and time; it is just as simple to restore the backup as it is to create it

Alarm Indication When you receive an alarm, the alarm is clearly marked by a red event in the event log and you can easily see who or what has triggered the alarm

Export You can always make a backup of the event log. Either via a CSV file which you can import to Excel or direct to a PDF file

Communication Settings You have a number of possible communication settings that can be synchronized with your network.

Alarm Settings You can choose between many different alarms for your key cabinet. For example, door alarm, key alarm, break-in alarm, etc.

KeyWin 6-PRO and KEYBOX Security Key Cabinets

The Key-Box series smart range of electronic key cabinets with electronic key identification for monitoring and control of each individual key. The Key-Box administration is performed using the PC program keyWin 6 Pro, where all events are logged and saved
